

Referral program

Invite users to the platform and earn rewards from their P2P trades. The Referral Program allows you to earn from 15% to 30% of the platform fee from each completed trade involving your referral.

The more actively your invited users trade, the more you can earn.

How it works

After registration, you receive a personal referral link or code. A user who registers using your link or code becomes your referral.

The referral relationship is assigned permanently:

- the referral is linked to the inviting user at the time of registration;
- the inviting user cannot be changed after registration;
- if a user registered without a referral link or code, they cannot add an inviter later;
- the number of invited users is unlimited.

Any registered user of the platform may participate in the Referral Program.

Reward amount

The referral reward is calculated based on the platform fee received from a completed P2P trade.

The reward amount depends on who participates in the trade.

1. Your referral trades with a user who has no inviter

If one participant in a P2P trade is your referral and the other participant registered independently, you receive:

30% of the platform fee

Example:

Your referral completed a P2P trade with a user who registered without an invitation.

The platform fee for the trade was 10 USDT.

Your reward will be 3 USDT.

2. Both trade participants are your referrals

If both participants in a P2P trade are your referrals, you receive:

30% of the platform fee

Example:

Two users you invited completed a P2P trade with each other.

The platform fee for the trade was 20 USDT.

Your reward will be 6 USDT.

3. Your referral trades with another user's referral

If one participant in the trade is your referral and the other participant is a referral of another user, the reward is shared between the two inviting users.

In this case, each inviting user receives:

15% of the platform fee

Example:

Your referral completed a P2P trade with a user invited by another platform participant.

The platform fee for the trade was 10 USDT.

You will receive 1.5 USDT, and the other inviting user will also receive 1.5 USDT.

When rewards are credited

Referral rewards are credited automatically immediately after the P2P trade is completed.

Rewards are credited only for trades that have reached completed status.

If a trade was cancelled, not completed, or no platform fee was received from it, no referral reward is credited.

If a trade went through a dispute but was eventually completed, the referral reward is credited after its final completion.

Reward currency

Referral rewards are calculated and paid in the cryptocurrency of the trade.

For example:

- if your referral bought BTC in the BTC/KZT pair, the reward will be credited in BTC;
- if your referral bought ETH in the ETH/USDT pair, the reward will be credited in ETH;
- if your referral bought GRAM in the GRAM/USDT pair, the reward will be credited in GRAM.

The reward is credited to the user's main balance and can be used in the same way as other funds on the balance.

Reward withdrawal

Credited referral rewards become available immediately after they are added to the balance.

You may withdraw them at any time, provided that the available balance in the relevant currency is equal to or greater than the minimum withdrawal amount for that currency.

Who should you recommend the platform to?

The Referral Program is especially useful for those who work with cryptocurrency, P2P exchange, OTC trades, or have an active audience in the crypto space.

You can recommend the platform to:

- P2P traders — users who regularly buy and sell cryptocurrency;
- arbitrage traders — those who work with price differences between markets and payment methods;
- exchange offices — teams and private exchangers that need an additional flow of users;
- OTC sellers — those who conduct trades directly with clients;
- miners — users who regularly sell mined cryptocurrency;
- traders — active participants in the crypto market;
- crypto communities — chats, channels, and communities where exchange, trading, and digital assets are discussed;
- Telegram channel owners, bloggers, and community administrators — anyone who can recommend the platform to their audience.

Why it is beneficial

You receive rewards not merely for a user's registration, but for their real trading activity.

This means that one active referral can bring you rewards again and again — every time they complete a P2P trade on the platform.

The Referral Program is suitable both for occasional recommendations to friends and partners and for systematic user acquisition through communities, channels, exchange services, and professional crypto networks.

Protection against abuse

The Referral Program is intended for inviting new users and developing an active platform community.

The platform may refuse to credit or may cancel a referral reward if it detects abuse, fictitious trades, or the use of related accounts for the purpose of receiving rewards.

Changes to the terms

The platform reserves the right to change the terms of the Referral Program. The current terms are always published on this page.
